

Fieldwork Annual Reports

OUR FIELDWORK PROGRAM

Since 2016, Badlands Dinosaur Museum has established one of the **largest summer field research programs** in the northern Great Plains. Led by **Dr. Denver Fowler and Dr. Elizabeth Freedman Fowler**, each year we spend ~2-3 months collecting primarily vertebrate fossils from Mesozoic rocks of the region.

In November or December each year we host our Annual Field Report. From 2020 to 2022 these have been livestreamed and archived on YouTube. Please follow the links below to see reports from the past few years.

Badlands Dinosaur Museum

6th Annual FIELD REPORT

Live 6pm MT
Thurs 1st Dec
2022

CHANNEL 19

YouTube

facebook LIVE

Join us as we present new dinosaur discoveries from our summer fieldwork, and hear about other fossil news from Badlands Dinosaur Museum!

Presentation by:
Dr. Denver Fowler, Dr. Elizabeth Freedman Fowler
Amanda Hendrix, & Steven Clawson

6:00pm - Live presentation - Streamed online
Dickinson Museum Center Facebook page
Dickinson Public Access TV
Livestream or watch later on YouTube!

DICKINSON MUSEUM CENTER

2020 Field Report Video

Every year in Fall we give a public report presenting the results of the summer field season (so far!).

Because of Covid19 restrictions, in 2020 we cancelled our in-person presentation and livestreamed the field report online.

This video was originally streamed live on the [Dickinson Museum Center Facebook page](#) on Thursday November 19th 2020. If you [stream the HD video via our Facebook page](#), then you can see comments made by viewers at the time. If you prefer not to use Facebook, then the embedded [360p video is hosted on YouTube](#).

Video production by Aaron Meyer.

Please Consider Donating!

Many institutions are downgrading their fieldwork programs, favoring the purchase of commercial specimens, or even limiting or closing their collections.

Badlands Dinosaur Museum is committed to fieldwork; to make the discoveries that are needed to keep science moving forward; to fill our museum with new dinosaurs and other fossils to inspire new generations.

Our experienced field crew has identified many new dinosaur sites. However, the amount of time we can spend collecting new dinosaurs is directly related to how much money we can raise for the field program. Don't believe what you read in the news: dinosaurs do not cost millions of dollars to dig up! Our fieldwork is streamlined, and cost effective. In 2017 we spent less than \$3000 on fieldwork, yet made many important discoveries.

Even if you can't offer financial support, we are ever in need of supplies and equipment.

Please see our Membership & Donate page for details on how you can help our paleontology program!
