

Badlands Dinosaur Museum

Established in 1992, Badlands Dinosaur Museum features an evolving exhibit of fossils and minerals, a public preparation lab, and a vibrant research and fieldwork program.

Formerly operating as Dakota Dinosaur Museum (1992-2015), the newly renamed **Badlands Dinosaur Museum** is undergoing a total overhaul of exhibits and facilities.

We are busy designing and installing new exhibits, featuring new fossils discovered by our field crew and prepared in our public-viewing laboratory. Our research and collections areas are expanding too. Please stop by and see what we are up to! There is always something new!
